

Chris Fitch is a sculptor, engineer and inventor. His prize-winning mechanical sculptures, installations and performance-based artwork have been presented internationally. His puppets and state-of-the art miniature theaters have appeared with major symphony productions in New York and Los Angeles. His credits for work in animation include Sesame Street, Motorola, Disneyland, and Samsung. Further projects have included the design of a toy factory, independent invention, landscape design, a tree house bed and breakfast inn in the Philippines, and the development of workshops about kinematics, motion as medium, and foam latex stop motion puppetry.
